SKILLS

Front End

- AngularJS
- Bootstrap
- HTML5
- CSS3
- JQuery

Back End

- Node.js
- Express
- MongoDB
- Mongoose
- Nginx

Tools

- Github
 - Jasmine/Karma
 - Digital Ocean
 - RESTful web service
-

RECENT PROJECTS

Attorney Case Management App (Real Estate): A full stack web app built in AngularJS on the front end, with Express server running in Node.js, using a MongoDB on the backend. This is a modern rewrite of a case management program I wrote years ago for my legal practice using visual basic.

The CarView Project: An AngularJS web app using Bootstrap that connects with the edmunds.com API to retrieve information on any car in their database, including make, model, year, photographs, editorial content and reviews.

Please visit my portfolio site at evmorrison.com for a complete listing.

EDUCATION

FULL STACK WEB DEVELOPMENT - V School, Provo, UT	2016
J.D. - Duke Law School, Durham, NC	1999
B.S. STATISTICS - BYU, Provo, UT	1996

ACHIEVEMENTS

- I took the initiative, as an attorney for a small title company, to learn VB code on my own time to write an app to automate workflow across Word, Outlook, and Excel. Dramatically reduced doc prep time, improved accuracy and response time, and enabled better tracking of performance.
 - Skilled in problem solving, customer service, and team management. Handled case load of upwards of 100 files at First American Title, was responsible for formulating the plan to resolution for each file, and managed the team of outside attorneys, surveyors, etc., to carry out the plan, while keeping the customer informed about the process.
 - Comfortable working independently or collaboratively. I am a good communicator and understand principles of good teamwork.
 - Invited to guest lecture at University of Utah, Finance Course 4740 (Real Estate Principles).
-
